

Please do not stop satellite radio from broadcasting traffic and weather. I pay a monthly subscription fee to listen to satellite radio because I am fed up listening to the normal radio broadcast, which is now at least 30 minutes of ads an hour. The United States is constantly restricting what the people of the US listen to even though the constitution of the United States tells us we have the freedom of speech and the freedom to listen to what we want. Please back off of the radio broadcasters and satellite radio and lets have plain old competition dictate what I want to hear. In conclusion please reject NAB petition 04-160 and lets stop harassing Howard Stern

Thank you for your time.
